

**MAXIMUM ENGINE PROTECTION****IDEAL FOR FERTILIZER TRANSFER**

Series 'S' assembled with a protek

Large cavity to protect engine against any possible seal failure. Fail safe design.

Oversized slinger to prevent any liquid passing through system.

Oversized weep hole directs liquid down, and away from operator.

**PACER PUMPS IS THE  
ORIGINATOR OF THIS  
UNIQUE DESIGN**

Our unique protek system is designed to physically separate the pump from the engine. This provides you with **maximum** engine protection, even against catastrophic seal failure. Available as a prebuilt option from the factory or as a retrofit kit to upgrade your current model. Consult factory for details. Refer to part number P-58-0015S.
